

metabolism

digestive system

Nutritional deficiencies associated with Pyroluria include zinc, vitamin B6, biotin and Gamma-Linolenic Acid. While Pyroluria is not conclusively linked to a variety of health conditions, we do know that deficiencies in the above nutrients have been proven to cause or contribute to a variety of **digestive** and **metabolic** disorders.

Digestive System

Celiac disease

Crohn's disease

Colitis

Diarrhea

Diverticulitis

Hypochlorhydria

Irritable bowel syndrome

Leaky gut syndrome

Nausea

Pancreatitis

Pancreatic deficiency

Poor appetite

Ulcerative colitis

Ulcers

Vomiting

Metabolism

Blood sugar irregularities

Chronic fatigue syndrome

Elevated cholesterol

Fatigue

Fatty liver

Hypothyroidism

Insulin resistance

Lethargy

Liver damage

Liver detoxification

Low HDL-cholesterol

Obesity

Pancreatic function

Thyroid function

Type I diabetes

Type II diabetes

Reduced basal metabolism
